                                                                                                                                                                                                                                                                                                                                             Sequence 31, Application US/09224024

Patent No. 605693

GENERAL INFORMATION:
APPLICANT: Lealie Hickle
APPLICANT: Jewel Payne
TITLE OF INVENTION: Materials and Methods for the Control
TITLE OF INVENTION: Calliphoridae Pests
NUMBER OF SEQUENCES: 31
CORRESPONDENCE ADDRESS:
ADDRESSEE: David R. Saliwanchik
STREET: 2421 N.W. 41st Street, Suite A-1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         STATE: FL.
